

SUBLETTE COVID-19 RESPONSE GROUP

Sublette County Case Counts*

Lab confirmed:	35
Probable:	9
Active cases:	2
Deaths:	1
Total Recovered:	39

*Cumulative totals

Sublette County's COVID-19 case count increased for the first time in a week when two new cases were confirmed, and one death was recorded.

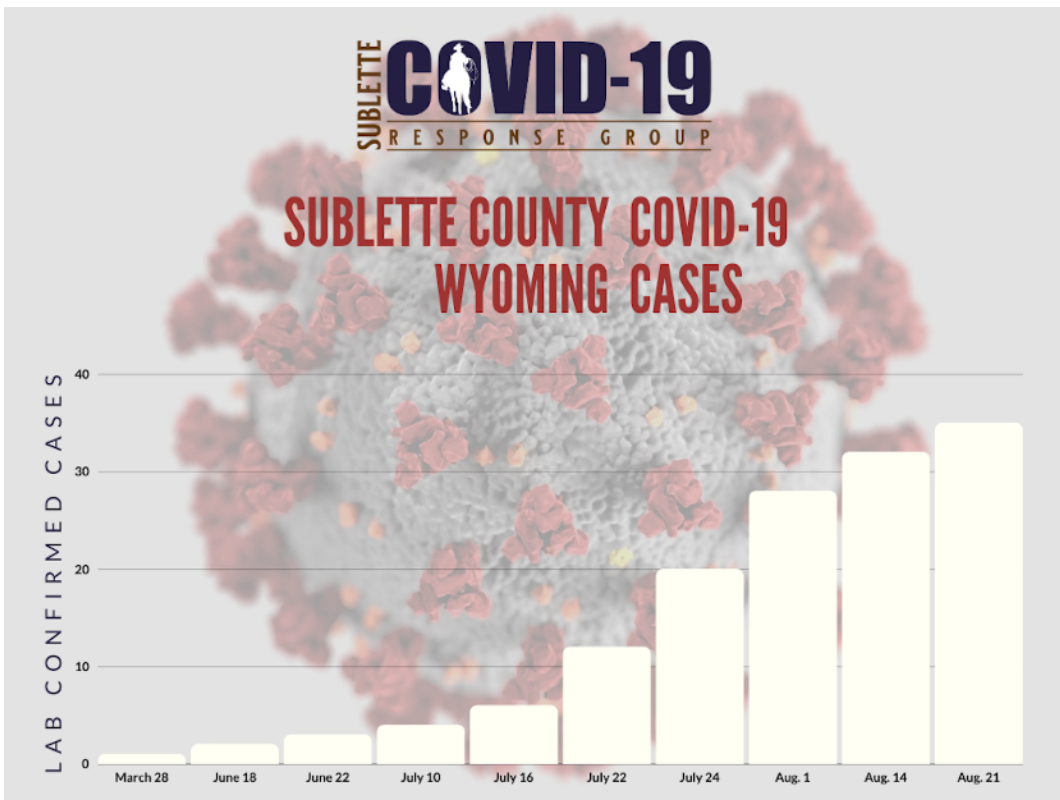

The new cases include an adult woman and an adult man. Both are recovering at home.

While most COVID-19 patients in the county have been able to recover at home, one person remains hospitalized.

Sublette County Public Health reports that there are currently 5 people in isolation or quarantine in the Pinedale and Daniel areas.

We are saddened to report that Sublette County has recorded its first COVID-19 death.

An older adult woman who was a Sublette County resident died earlier this month in a long-term care facility in Utah where she was exposed to the virus, according to the Wyoming Department of Health.

Current Counts

Worldwide:

22.7 million cases, with 795,000 deaths.

United States:

5.5 million cases, with more than 174,000 deaths.

Wyoming:

Nearly 3,000 lab-confirmed cases, plus 530 probable cases, and 37 deaths.

Symptoms

Disease symptoms may appear 2 to 14 days after exposure.

Symptoms include fever, cough, shortness of breath or difficulty breathing, chills, muscle pain, headache, sore throat and new loss of taste or smell.

Older residents and people with certain health conditions have a higher risk of developing more serious illness.

People without symptoms may spread the virus.

COVID-19 TESTS

Patients experiencing symptoms of COVID-19 can call the Pinedale Clinic to schedule an appointment for a COVID-19 test. For those without insurance, call Public Health at 307-367-2157 to learn if you qualify for a free test voucher.

Although the clinics are not able to test those without symptoms at this time, plans are being made to be able to do so in the future.

ANTIBODY TESTS

Antibody testing is also being offered at both clinics in Sublette County. This test is to see if you have had the virus in the past. Call either clinic to schedule an appointment for the blood draw. The \$50 testing fee must be paid at the time of service.

HOSPITAL VISITATION

Most visitors are now prohibited at hospitals in the region (with limited exceptions) to protect staff and patients from the risk of COVID-19 transmission. This policy includes St. John's Health in Jackson, and Eastern Idaho Regional Medical Center facilities in Idaho Falls.

THE SUBLETTE COVID-19 RESPONSE GROUP
IS HAPPY TO RECOGNIZE
WIND RIVER BREWING COMPANY
WITH A CERTIFICATE OF EXCELLENCE FOR MAINTAINING
